**DETAILED ACTION**

***Allowable Subject Matter***

1. Claims 1-5 are allowed. The following is an examiner's statement of reasons for allowance:

Claims 1 and 5: The prior art fails to teach or make obvious a driver comprising a driver circuit for driving a plurality of loads from a plurality of motors; a control circuit controlling the driver circuit; the driver circuit comprising at least 3 output terminals to connect at least 2 loads, each output terminal being led out from a node of a PNP transistor and an NPN transistor connected in series through a node such that each pair of the output terminals adjacent to one another constitute a bridge circuit assigned to drive one load; the control circuit turns on and off the PNP and NPN type transistors of the bridge circuit to energize the load in either a normal or reverse direction; one of the output terminals is led from a node of a PNP transistor and an NPN transistor, one of said transistors being driven by a constant electric current through a feedback loop and the other of the transistors being driven by a constant current through an open loop; a particular output terminal and another output terminal constituting a bridge circuit for driving a load by the constant current through either of the feedback loop and the open loop properly depending on whether the load is energized in a normal or reverse direction.

Claims 2-4: the claims depend from claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
